## Company Info

For the past 15 years, Ningbo TLT has been delivering efficiency to the intralogistics market through our products and services. From our humble beginnings we have grown to one of the largest material handling equipment companies in China. At the same time, our products and services portfolio has diversified from supplying simple storage products in the local markets to providing dynamic storage solutions around the world, offering our customers the broadest array of storage products. Our product lines include pallet rack, rivet shelving, bin storage rack, wire shelving, cabinet and aluminum ladders, customized to your specifications and product application.

TLT is dedicated to quality and safety. All aspects of quality from product design and manufacturing to solution development and on time delivery demonstrate the company's commitment. TLT has been accredited to ISO 9001 since 1998 and to SGS certificate since 2010. Our market now has enlarged to North America, Western Europe, Japan and Australia.
